Intersections of Race, Class, and Gender in Film-slice Spanish Literature and Culture-Jennifer Smith 2009 This volume focuses on intersections of race, class, and gender in film adaptations of Spanish literature, specifically on the novel, the novel in film, and the novel as a cultural artifact. In this groundbreaking volume, a diverse group of scholars explore the diverse perspectives and experiences of characters defined by race, class, and nationality, and use the film as a site of cultural production. The contributors bring together a range of theoretical approaches to examine the ways in which race, class, and gender intersect in cultural production and representation. The volume highlights the importance of considering these intersections in the context of Spanish and Latin American identities, and provides a critical perspective on the ways in which the film industry perpetuates and challenge these identities. Intersectionality and “Race” in Education - Kalwant Bhopal 2012-01-25 Education is a controversial subject in which difficult and contested discourses are the norm. Individuals in education experience multiple inequalities and have diverse identifications that cannot necessarily be captured by one theoretical perspective alone. This edited collection draws on empirical and theoretical research to examine the intersections of “race,” gender and class, alongside other aspects of personhood, within education. Contributors from the fields of education and sociology seek to locate the dimensions of difference and identity within recent theoretical discourses such as Critical Race Theory, Judith Butler and ‘queer’ theory, post-structural approaches and multicultural models, as they analyze whiteness and the education experience of minority ethnic groups. By combining a mix of intellectually rigorous, accessible, and controversial chapters, this book presents a distinctive and engaging voice, one that seeks to broaden the understanding of education research beyond the confines of the education sphere into an arena of sociological and cultural discourse.

Intersectionality in Educational Research - James L. Olive 2015-07-23 The purpose of this work is to advance understanding of intersectional theory and its application to research in education. The scholars whose work appear in this volume utilize intersectional theory and research methods to work in fields and disciplines such as Education, Sociology, Women’s Studies, Africana Studies, Human Development, Higher Education Administration, Leadership Studies, and Justice Studies. The book illustrates how intersectional theory can be used in both quantitative and qualitative education research on college student access and success, faculty satisfaction and professional development, and K-12 educational issues such as high school dropouts and bullying. This book is unique, as no other book ties intersectionality to the research process. Key Features: * Readers will learn the basic tenets of intersectionality and how it can be useful in education research. * Readers will learn how intersectionality can be used to analyze both quantitative (large scale survey) and qualitative (interview, participant observation, and ethnographic) data. * Lastly, readers will learn how intersectionality can be particularly useful in examining the experiences of diverse groups of students attending elementary schools, high schools, colleges and universities, and faculty working at post-secondary institutions. Intersectionality is increasingly being used in research and education. This theory holds great promise in exploring students’ experiences in terms of access, success, and outcomes for marginalized groups. In essence, application of the theory promotes critical complex thinking regarding the intersectionality of race, class, and gender and their outcomes.
